

FSC™ Expert Training Course

Get on top of the FSC system

Our FSC auditor training course equips you with the tools, knowledge and skills needed for FSC auditors and others working with FSC certification.

Become a qualified FSC Lead Auditor

Our FSC auditor courses are based on FSC requirements as well as the ISO 19011 guidelines for auditors.

Our training is endorsed as fulfilling FSC's formal requirements for auditor training. ISO training is normally required for FSC auditors; however, you do not need to attend a separate, formal ISO course if you have passed our FSC lead auditor training¹.

If you pass the final exam, you will obtain a Certificate of Successful Completion. Those who do not pass the exam will receive a Certificate of Attendance.

Gain from intensive training

The training course consists of online modules and an in-person training session. It is an intensive, high-speed event designed to provide you with deep insight. Your learning takes place through a mixture of presentations and classroom exercises, with plenty of opportunity

for applying your new knowledge as soon as you have acquired it.

So what will you learn exactly?

Well, nearly everything that relates to Forest Stewardship Council™ certification. Some of the world's most experienced trainers will guide you through everything you need to learn to become a qualified FSC auditor. Your trainers will provide you with technical knowledge about the requirements of FSC Forest Management, Chain of Custody, Controlled Wood and Trademark Use standards.

In addition, you will learn and practice auditing techniques, report writing and teamwork skills. You can look forward to an event performed by experienced trainers and offering an opportunity to meet others interested in knowing more about FSC certification.

I gained a lot of insight into how FSC certification works, in a friendly and social environment.

– Pawel Domagalski, IKEA Trading Area
Central Europe

1 Note: In order to be fully approved as an FSC lead auditor you will also need to have the relevant experience and credentials as well as participation on actual FSC audits in the field.

NEPCon's FSC Expert Training Course is endorsed by Accreditation Services International (ASI) as fulfilling all FSC requirements for training of FSC Lead Auditors.

Full-service concept

You will get a full package including tuition, training materials and all meals throughout the training course.

The events are organised at venues situated within attractive surroundings, so that you can enjoy and explore the location at your leisure.

So far, NEPCon has provided FSC auditor training for more than 250 participants from over 25 countries.

I really enjoyed the training.

– Rickard Frithiof, Management Consultant, Vattenfall Power AB

Course language

Our scheduled training events are conducted in English or Russian. Training in various other languages can be arranged on request. Please contact us for further information.

Book your event now

Our events are increasingly popular and we normally schedule 4-6 open training events per year in different locations in Europe and Asia.

In order to ensure top quality training, each course is limited to a maximum of 15 participants, so we recommend that you sign up for your training course as early as possible. If you book at least 2 months in advance of your training course, you will receive a 10% discount. There are special discount rates available for representatives of FSC National Initiatives and NGOs.

You can find more information about the course fee, view a sample agenda, check our training schedule and book the event that suits you best at www.nepcon.org/training
